

Air1 provides music and information that I am unable to receive from anywhere else in Phoenix market.

Should the Phoenix market lose the frequency currently held by Air 1, it would exclude all persons the opportunity to hear this genre of music.

The service Air1 provides is beneficial to the Phoenix public because it operates as a "clean" (i.e. no swearing), child friendly, family friendly entertainment and information vehicle that is valued by those who it serves.

Please consider the unchallenged continuation of this frequency to the Phoenix market or provide another frequency that still would reach the market with out extra expense, conditions or degradation of signal that would limit Air1 in Phoenix.

Many thanks for your careful and thoughtful consideration.
